Clerical/Secretarial	\$54.52

The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.

## **(CUSTOMER INFORMATION: Continued)**

**PROGRAM MANAGER** – This senior-level professional maintains administrative control of the execution of construction management programs or projects, and serves as the primary administrative and contractual point of contact between the client agency and Black & Veatch for the provision of services. The individual must have at least 12 years of pertinent experience, and must have a Bachelors Degree in a field of study related to engineering, architecture, construction, or construction management.

**SENIOR CIVIL ENGINEER (CI)** – This professional provides comprehensive construction management services independently in a leadership role, either in the field or in an office environment, and administers the services of subordinate staff. This labor category includes individuals from the structural engineering disciplines as required by the needs of each specific construction management project. The individual must have at least 21 years of pertinent experience, must have a Bachelors Degree in an engineering discipline granted by an ABET accredited program, and must be a licensed Professional Engineer in the home country or the country in which the individual is practicing.

**JUNIOR CIVIL ENGINEER (CI)** – This professional provides comprehensive construction management services in a role subordinate to senior staff, either in the field or in an office environment. This labor category includes individuals from the structural engineering disciplines as required by the needs of each specific construction management project. The individual must have at least 3 years of pertinent experience, must have a Bachelors Degree in an engineering discipline granted by an ABET accredited program, and must hold an Engineer-in-Training certificate issued in the home country in which the individual is practicing.

**SENIOR MECHANICAL ENGINEER (MI)** – This professional provides comprehensive construction management services independently in a leadership role, either in the field or in an office environment, and administers the services of subordinate staff. This labor category includes individuals from the mechanical engineering disciplines as required by the needs of each specific construction management project. The individual must have at least 21 years of pertinent experience, must have a Bachelors Degree in an engineering discipline grant by an ABET accredited program, and must be a licensed Professional Engineer in the home country or the country in which the individual is practicing.

**JUNIOR MECHANICAL ENGINEER (MI)** – This professional provides comprehensive construction management services in a role subordinate to senior staff, either in the field or in an office environment. This labor category includes individuals from the mechanical engineering disciplines as required by the needs of each specific construction management project. The individual must have at least 3 years of pertinent experience, must have a Bachelors Degree in an engineering discipline granted by an ABET accredited program, and must hold an Engineer-in-Training certificate issued in the home country or country in which the individual is practicing.

## **(CUSTOMER INFORMATION: Continued)**

**SENIOR ELECTRICAL ENGINEER (EE)** – This professional provides comprehensive construction management services independently in a leadership role, either in the field or in an office environment, and administers the services of subordinate staff.
